MR - MRS LAYING INSTRUCTIONS

Before starting the installation process, make sure that the surface is level and has been thoroughly cleaned. For proper installation, it is essential to use adhesives that are compliant and suitable for the intended purpose. For installations in humid environment, such as bathrooms and showers, it is highly recommended to properly waterproof the laying surface using specific products for this purpose to avoid any water infiltration. In case of cuts, take care in sealing the affected area with silicon so as to avoid any further water infiltration.
